Clayton

Mon, Tues, Wed & Fri 9AM – 12PM

VACCINES	FEE	SERVICES	FEE
Rabies	\$20	Heartworm Test	\$25
Distemper	\$20	FIV/Feline Leukemia Test	\$30
Canine Flu	\$20	Fecal Test	\$35
Bordetella	\$20	Microchip (includes registration)	\$15
Leptospirosis	\$20	Puppy/Kitten Deworming	\$7
Lyme	\$31	Deworming >6 months	\$7 (per 20 lbs)
Feline Leukemia	\$31		

There is a \$15 office visit fee per animal per visit. The fee for multiple animals brought in the same visit is: \$15 for the first animal; \$5 each additional animal.

Mastercard, Visa, Discover, & Cash accepted. No checks.

Please note that our practice is limited to the services listed. PFA recommends that you develop a relationship with a full-service veterinarian for your pet's complete healthcare needs.

Surcharges

Our organization's mission is to reduce pet over-population through prevention (spay/neuter). We do not support breeding your pets. Therefore, PFA imposes a \$20 surcharge (per animal per visit) for pets over 6 months of age that are reproductively intact. This surcharge can be credited toward surgery if you schedule your pet for spay/neuter at the time of your visit. We also impose a \$200 Breeder Surcharge for intentionally bred litters of puppies or kittens presenting for Wellness Services.

Low-Cost Spay/Neuter for Dogs and Cats

Surgery Fees*

DOGS

	Male	Female
Under 65 lbs	\$140	\$150
65 lbs & over	\$160	\$170

Pregnant (dogs): add \$10

Hernia Repair: add \$35

CATS

	Male	Female
Pets	\$95	\$95
Feral**	Call to Inquire	

* Surgery packages include exam, a pain control injection, Elizabethan collar, and oral pain medication for home use (Feral Cats and 501(c)(3) patients do not receive Elizabethan collars and oral pain medication for home use), penicillin as indicated, tattoo and medical waste disposal. Sales tax is not included.

** Feral Cats must be unsocialized and be part of a TNR effort. All Feral Cats will be ear-tipped.

Health Benefits of Spay/Neuter

Spaying by 5 months of age is the best way to ensure your pet does not have an unplanned pregnancy and will reap the most health benefits from spay/neuter.

Pyometra – 1 in 4 female dogs develop a life-threatening uterine infection or “pyometra” during their lifetime. Spaying before the first heat prevents this.

Cancer – The serious & expensive possibility that your pet will develop cancer or tumors of the reproductive organs is completely eliminated because these organs are removed. Spaying before the first heat nearly eliminates the chance your pet will develop mammary (breast) cancer. Mammary cancer is often fatal since it frequently spreads to the lungs.

Heat/Pregnancy – During a heat cycle, your pet can become pregnant. After spaying, your pet will no longer go into heat, eliminating the mess and discomfort of living with an animal in heat. Spaying also prevents the possibility of pregnancy and the dangers associated with giving birth.
