WE KEEP LIFE FLOWING™

BE SAFE. SLOW DOWN IN WORK ZONES.

Your safety, as well as the safety of your neighbors and our workers, is important to us! We work hard to keep our job sites safe, and we appreciate your effort to slow down and use caution around the construction site.

Center**: 1-800-272-1325
Hours: 7 a.m.–7 p.m., M-F
For emergencies,
we're available 24/7.

12-2019

WE'RE INVESTING \$1.8 MILLION IN WESTFIELD

MAIN REPLACEMENT PROJECT TO START SOON

New Jersey American Water is preparing to replace approximately 4,110 feet of aging 6-inch water main that was installed in the 1920s with new 16-inch ductile iron main along **W. Broad Street** (from Lamberts Mill Road to South Avenue). The project also includes replacing nine fire hydrants and 109 utility-owned service lines along the pipeline route (see reverse for more information about service lines).

We'll also be installing meter pits at the curb area (in our right of way) of properties where none exist. After installation, all that will be visible is a 15-inch circular cover that will be flush with the ground.

The project represents a critical investment for the company in support of our commitment to provide customers with safe, reliable water service.

PROJECT START/END AND WORK HOURS

Weather permitting, our contractor, CRJ Contracting, will begin work on or about **January 31** and be completed by the end of **April 2020**. Work hours will be from 7 a.m. to 5 p.m., Monday through Friday. Work outside of these hours is not expected unless required to maintain project schedule. Final street restorations will be completed in the summer of 2020.

ACCESS TO THE METER

Once the meter pits are installed, and the entire project is complete, we will contact you to set up an appointment to move the meter from inside the property to the meter pit. To perform this work, we'll need to gain access to the existing water meter located inside your property. There is no cost to you to have this work performed. The relocation of the meter should take approximately 20–30 minutes.

HOW TO PREPARE

To prepare for the removal of the meter from inside your property, we ask that you clear the area to the water meter for safe and easy access. During the process of the meter relocation the water service will be interrupted for a few minutes.

INFRASTRUCTURE. ONE MORE WAY WE KEEP LIFE FLOWING.

ABOUT SERVICE LINES

There are two components of a service line.

Utility-owned portion of the service line: This is the portion of the service line that extends from the company's main in the street to the company shut off valve (generally located near the curb).

Customer-owned portion of the service line: The property owner is responsible for this portion. It extends from the company shut off valve to the inside plumbing.

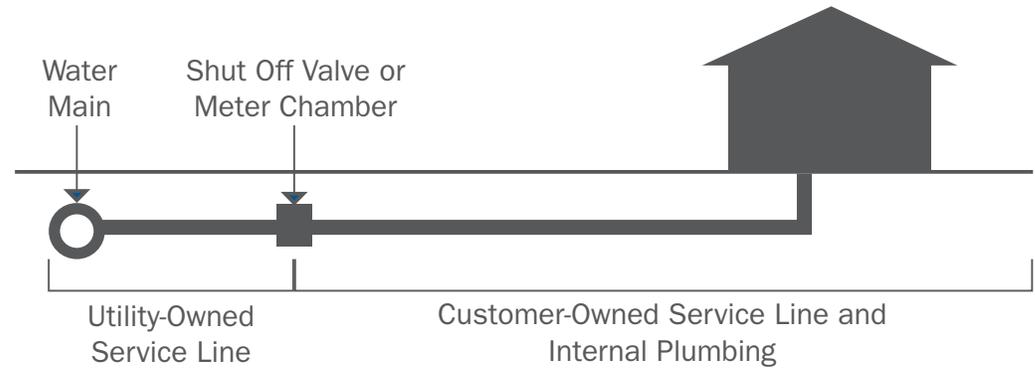

If we replace the utility-owned service line serving your property, we'll notify you on the day the service line is replaced with further instructions on how to flush your household plumbing prior to using the water. If you're not home, we'll leave the instructions at your front door.

WHAT'S YOUR SERVICE LINE MADE OF?

Over the years, plumbers have used many different materials, including copper, PVC, lead and others. One way to find out what your service line is made of is to contact a licensed plumber. If we find lead during the course of our main replacement project, we'll contact you to discuss replacing your service line. Replacing lead service lines reduces your potential exposure to lead. To learn more, visit newjerseyamwater.com. Under Water Quality, select Lead and Drinking Water.

UTILITY-OWNED VS. CUSTOMER-OWNED PORTION OF THE SERVICE LINE

Please note: This diagram is a generic representation. Variations may apply.

PROJECT OVERVIEW AND WHAT YOU CAN EXPECT

- **Install, disinfect, test and place new main into service.** While we interconnect the new main to the distribution system, customers may experience a temporary service interruption. Customers may also experience a slight discoloration of water. If this happens, run the cold water until it is clear.
- **Replace utility-owned service lines and transfer customers to the new main.** Once the main is installed, we will return to connect customers to the new main. This may involve replacing utility-owned service lines. If we are replacing the utility-owned service line at your property, typically there is a 30-60 minute interruption of service while the contractor connects the new service line. We will attempt to notify you 24 hours in advance as well as on the day the service line is replaced with instructions on how to flush your household plumbing prior to using water. It is important that you read and follow these instructions. If you're not home, we'll leave the instructions at your front door. You may want to consider storing a few gallons of water for drinking and cooking during the service line work.
- **Perform final paving and any restoration of concrete, driveway, grass and landscaping.**

Our crews will work as quickly as possible to shorten the length of these temporary inconveniences. We appreciate your patience and understanding during this project.

TRAFFIC FLOW AND ACCESSIBILITY

For the public and workers safety, traffic restrictions and/or alternating traffic patterns are likely to occur during work hours. New Jersey American Waters inspector, along with the contractors personnel, will provide a minimum of 24 hours notice prior to any parking and/or driveway use restrictions. All emergency vehicles and local traffic will be allowed access during construction.

NOISE

As with any construction project, some noise will be unavoidable. We apologize for any inconvenience and appreciate your understanding and cooperation.

SITE MAINTENANCE

The project site will be maintained and cleaned each day before contractors have completed work.
